TECHNICAL SKILLS

Frontend Technologies: HTML5, CSS, JavaScript, Tailwind CSS, ReactJS

Backend Technologies: Node.js, Express.js, MongoDB, Mongoose, RESTful APIs, JWT

Data Science & Programming: Python, Java, OOP, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, NLP

Tools & Platforms: Git, GitHub, Vercel, VS Code

PROJECTS

MiniStore

[GitHub](#)

ReactJS, Tailwind CSS, Node.js, Express.js, MongoDB

- Developed RESTful APIs for authentication, products, cart, and orders using JWT and Bcrypt.
- Implemented role-based admin panel for product management and integrated Cloudinary for image storage.
- Built responsive ReactJS + Tailwind frontend with lazy loading for improved performance.
- Added hero-section offers carousel and skeleton loaders to enhance UI/UX.

TalentMatch AI – AI-Powered Resume Analyzer (Under Development)

[GitHub](#)

ReactJS, Node.js, Express.js, MongoDB, FastAPI, NLP, sentence-transformers

- Building an AI-powered resume analysis platform to extract candidate skills and analyze resume-job description matching using NLP techniques.
- Designing a microservice-based architecture integrating MERN stack with Python FastAPI services for resume parsing, semantic similarity analysis, and intelligent scoring.
- Implementing PDF/DOCX resume parsing, skill-gap detection, keyword analysis, and cosine similarity-based job matching using sentence embeddings.

Email Spam Detection

[GitHub](#)

Python, Scikit-learn, NLP, TF-IDF

- Developed an NLP-based spam detection system using supervised machine learning techniques.
- Performed data preprocessing and feature extraction using Pandas and TF-IDF vectorization.
- Achieved 96.7% accuracy using optimized Naive Bayes and SVM models.
- Deployed the model using a Streamlit web interface for real-time prediction.

TRAINING & ACHIEVEMENTS

MERN Stack Training – Zenith Education Solutions

June 2025 – July 2025

- Completed hands-on MERN stack training covering schema design, RESTful API design, middleware, routing, controllers, and database integration through projects like Ministore.

Smart India Hackathon – College Level

September 2024

- Designed the frontend for a crop disease detection application, enabling image upload and disease result display.
- Implemented reusable UI components for recommendations, project shortlisted to the waiting list stage.

EDUCATION

Bhagwan Parshuram Institute of Technology

Delhi, India

B.Tech – Artificial Intelligence and Data Science

Oct 2022 – June 2026

GPA: 8.47

Navy Children School, Kochi

Kerala, India

Class XII (CBSE)

2021

Percentage: 92.6%
